SUPPLEMENT TO REPORT NO. 25X1

THE DESCRIPT OF TRAINS CHARMED AND THE OF THE CHARLES OF THE CHARL

This is UNEVALUATED Information

- On the occasion of the meeting of a LIP Kreisvoustand (Evola Headquarters) on 17 august 1955, the Kreis secretary stated that it was the paramount 25 function of all Party members to make the Party and its supporters among the CDR population more State-conscious. It was no longer possible for the bourgeois circles to keep aloof from the workers and farmers state. There was only one alternative for the citizen of the GDR: to say "you" or "no" to the new State. Those who said "no" would have to bear the consequences. This applied in particular to the middle classes whose negative attitude toward the workers and farmers state was due to Western propagates. It was high time for the middle class to realize that it fill well in the GDR, whereas it was left in growing misory in the Federal Republic.
- 2. The speaker declared that it was also very important for the Party to intencify its propagands for all-Germany, whenever embers of the LDP wat to the Federal Republic they had to establish close centeens with FDP members. It was left to the diplomatic skill of the individual LPP members to find out what caused the criticism of the FDP supporters in Lestern Germany and to utilize these critical remarks for their anti-identury propagands. The LDP had a large field for its activities because it was known that many PDP members were against Adomause's foreign policy and stood for closer relations between the Federal Republic and the USSR.
- The speaker continued that it was the third function of the Party to work for friendship between the USSE and the CDE. Those and: the Party members who were real demonstrate and favored the new State were inceptably friends of the USSE, because it was the USSE which had created the model of a democratic country in Eastern Cornary. It seemed, however, that many State and Party functionaries were still full of distrust for the USSE because they had not yet grasped the idea of this friendship. These scopedes had been shamed by the USSE which had proved in all international negotiations and in all political situations to be a real friend of the CDE.
- 4. Referring to the Gemeindewahlen (Community Elections); who upcoker stated that it was the wish of the SED to make those elections a demonstration of the solidarity of all working class members. The SED had embored into negotiations with the Block parties with a view of bringing about the desired election results. But in the meantime, new political probabile had

SECULT NOFORN 25X1 arisen. Austria had gained sovereignty and the Geneva Conference had led to a general relaxation of tension between the East and the West. The new political situation required the cooperation of all peace-loving elements, and for that reason the Gemeindewahlen in the GDR had to be postponed. It was not true that the SED had demanded from the government the abolition of the Gemeindewahlen, because it feared that an election on the basis of different party lists might entall a defeat of the SED candidates. 5. The speech was followed by a violent discussion on the principal question of the so-called Parteiauftraege (Party orders). A large majority of the Party functionaries attending this conference flatly rejected the system of the Parteiauftrag, the introduction of which had been decided upon during the LDP party rally in Weimar. They expressed their indignation that such a revolutionary step had been taken against the will of the Party organizations and without informing them in advance. They declared that the Party leaders were apparently hoping that they could forestall the decline of the Party which had its cause in the corruption of the liberal Party program rather than in the inactivity of the Party members. Was it not enough that the LDP had tried to woo the SED? If it bried to adapt ist own organization to that of the SED, This would mean the end of the Party. Comment. This report shows clearly the difficult situation of the small bourgeoas parties. The party leaders are apparently convinced that the only way to stop the decline of the Party is to assimilate it in06 the SED. The violent opposition to this tendency and the request of the Party leaders for more State loyalty prove that the spirit of resistance is still present in the LDP. According to other information available, the situation of the CDU in the GDR is similar to that of the LDP.
